

**Fifth Annual Training Course
in Pediatric Nephrology**

*Pediatric Nephrology: From Principles to
Practice*

6-8 January 2012

All India Institute of Medical Sciences,
New Delhi

This Training Course, supported by the International Society of Nephrology, shall cover key topics in Pediatric Nephrology that are of practical relevance to paediatricians and residents in Paediatrics. We are privileged to have eminent international and national experts amongst our faculty, who shall highlight issues related to management of common medical and surgical renal problems in children. The combination of lectures and symposia with interactive sessions and practical hands-on workshops should provide an academically stimulating opportunity for interaction with leading experts while ensuring practical learning.

Highlights of Training Course

The key components of the course are

- Symposium on Tubular disorders
- Workshop on Peritoneal and Hemodialysis
- Interactive sessions on Critical care nephrology
- Management of Urinary tract infections and Nephrotic syndrome
- Case discussions: Hemolytic uremic syndrome, glomerulonephritis, hypertension, role of imaging and pathology
