AIIMS Nurses e Newsletter

From CNO's Desk

Dear all,

My heartiest congratulations to NIS team for successfully taking out the second edition of AIIMS Nurses e newsletter .

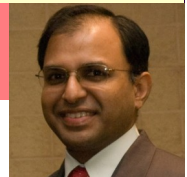

It has been an appreciable effort and one that has been lauded by one and all. It has given nurses a platform to showcase their talents , achievements and their hard work which they continually do behind the scene .

I would encourage all to participate in this endeavor so that Nursing family can stay connected with each other . The stepping stones to success are not planned , you have to seize the opportunity , and you all have the ability to the one step to being an agent of 'change'.

So, continue to contribute with your articles , writes-up for the AIIMS Nurses e-newsletter and together ,let's make the difference and be the 'change' agents.'

Ms. Sarita Mehta

Faculty In charge NIS, Dr. Deepak Agrawal

Nurses and residents are the backbone of any hospital and it is important they have kinship and a sense of belonging to the institute. Newsletters such as this can go a long way in realizing these objectives.

I am very appreciative of Metilda Robin, Teenu Xavier and Merin Lisa Kuriakose who have worked tirelessly to make this newsletter a reality. Being a e-Newsletter, there are no constraints on the number of pages and it can be disseminated quickly all over AIIMS through social media as well as through the website. I would welcome your comments and feedback so that we can continue adding more content and make this newsletter more meaningful for you.

Dr. Deepak Agrawal

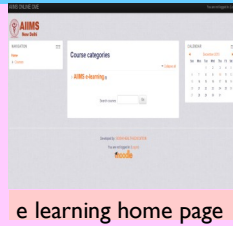

Nurse Informatics Specialist Initiatives

E Learning-A Personalized learning Experience

e learning is an initiative from computer facility in collaboration with Bodhi Health Education to provide online continuous medical education. This module is currently for nurses which helps them to update their knowledge.

minutes after which the system auto submits it. Post test has two attempts and is conditioned in such a way that the second attempt opens only if the first attempt score is below 60%. Computer facility is also awarding certificates for the users who score above 60%.

e learning works on moodle platform which is an open source platform that provides personalized learning environment for the users. The user can access it at www.aiimsdelhi.org both from intranet and internet. Every user has a unique user id and password with which they can access their profile.

e learning modules are live for resident doctors who can access using usernames and passwords. Modules online are Orientation of AIIMS and Computerization.

The modules online are Central venous pressure, Computerization and CPR. Each module has a pre-test, chapters and a post test and user has to complete the pretest before moving on to the chapters.

Tentative dates for closure of modules :

CVP: 30th June 2016

Computerization : 30th July 2016

CPR: 30th August 2016.

After logging in the user has to enroll themselves to a particular course by selecting 'enroll me' option. Pretest has only one attempt with a time limit of 10

It is mandatory for all nurses to complete the modules failing which a memo will be issued which will be attached in service book.

Impact of an Emergency Nurse Coordinator on Work Flow Optimization in Emergency Department

In October 2014, an emergency nurse coordinator (ENC) was created as a liaison between the inpatient department, other hospital facilities and the emergency department. This was a new role undertaken by the nursing informatics specialist. A total of four nursing informatics specialist are posted in emergency and one functions as emergency nurse coordinator in every shift. The goal of the new role was to improve the patient workflow in the emergency department. A study was done to assess the effect of ENC in optimization of workflow of the emergency department.

It was inferred that the emergency nurse coordinator has significantly improved the patient flow in the emergency department.

-Done by Raghunathan N, Preethy S, Metilda Robin, Dr.Deepak Agrawal

Parameters	Before ENC	After ENC	Difference	*p value
Admission time	43.6hrs	20.33hrs	23.27hrs	0.04
Length of stay in ED	70.6hrs	32.29hrs	38.31 hrs	0.01
Transfer time	32.51hrs	25.79hrs	6.72hrs	0.04
Review time	99.47min	43.38 min	56.09min	0.01

ADOPT A PATIENT

AIIMS launched 'adopt a patient' policy on 4th of June 2016, under which public donations can be made for patients who are unable to continue their treatment or bear cost of buying equipment needed for rehabilitation at home .

Benefits: Tax benefits:- You will get tax exemption for the amount you are donating to AIIMS

- **Benefits to patient:-** Your valuable financial contributions will be helping a patient to get their life saving treatment

The policy was launched with a focus on patients with brain and spinal cord injuries who are left with huge and enormous disability, requiring rehabilitation. Donations to AIIMS should be in form of money and tax benefits will be available for all donations except that given to individual patients. No donations in form of articles/medical instruments to the patients will be accepted by AIIMS. List of patients provided in website is verified and updated by the doctor treating that particular patient.

- **Benefits to patient's family:-** Financial support from you will reduce the financial burden on the family members which will help in improving the quality of life of patients as well as family members.

Donations can be also made to centers and for research activities. You can donate any amount for any patient .

BILLING MODULE

Billing module was introduced as a new initiative to streamline the process of billing. Both nurses and billing clerks are involved in the billing process. The workflow of billing module is as follows. At the time of admission payment will be taken as advance from the billing counter. Service entry for all the services provided should be done by nurses in the service entry template. After verifying the service entry for bed charges and other services provided, patient can be send to the billing counter. At the billing counter, billing clerk will verify the service entry and final bill settlement will be done. Refund/Due will be settled by the billing clerk.

Sl.No	Misconceptions about billing	Real Facts
1	Money will be deducted from the salary of nurses, if bill settlement done/done incorrectly	Money will not be deducted from nurse's salary as nurses are not directly handling money. In case of due/refund, billing clerk will be handling money.
2	Doing service entry is not the work of nurses	Nurses are the right person in the system to confirm the services which was provided to a patient during their hospital stay. In private wards, nurse usually sends a manual bill of all the services provided to the patient. Now with new bill settlement module, nurses need not to maintain a separate register for this purpose. Service entry will be done whenever a test is ordered in e hospital or appointment is taken for a particular test.
3	Bills were not made by nurses	Even before the introduction of billing module, nurses used to make bill for patients of private wards. For any special procedures like dialysis, nurses in the dialysis unit used to make the bill. Now instead of filling whole bill manually, one service entry of dialysis will be enough.

'Champions keep playing until they get it right'

NURSES DAY CELEBRATION-12th May 2016

DR.RP CENTRE AIIMS NEWDELHI

The day marks the birthday of Florence Nightingale, known as the founder of modern nursing. The theme for the day was "Nurses: A force for Change: Improving health systems' resilience".

Week-long activities were planned from May 6 to 12 by Nursing In-service education department of the centre. We celebrated the week in the memory of "The lady with the lamp-Florence Nightingale" and raise awareness of the important role nurses play in society.

Protecting the health and safety of patients is a top priority for our nursing staff. This year, we are proud to conduct activities which will directly or indirectly benefit many patients in many ways.

We organized daily health talk on different ophthalmic disorders at different areas of the centre for six days starting from 6th May to 11th May 2016.

A blood donation camp was organized at the OPD reception area on 10th May 2016 from 1PM to 4PM in collaboration with Blood Bank AIIMS. All staff including nursing, medical, social workers and even BVG workers participated very enthusiastically. Total 30 units of blood were donated over 3hours.

The focus of 2016 Nurses Week is building a culture of safety at every potential care point. We shared this commitment and want every person who enters our facility to feel a sense of safety and security, knowing he or she is in the best hands. We did this by creating environment in which our employees and medical staff are highly engaged and empowered to speak up when a potential threat is detected. We work daily to encourage and nurture safe behaviors to ensure that every patient has a positive experience.

On 12th May formal celebration of Nurses day was conducted at 7th Floor Lecture Theater Dr R.P.Centre. Medical Superin-

tendent Dr R.P.Centre, CNO AIIMS and Dr Deepika Khakha Lecturer CON AIIMS, were invited to grace the occasion. The pro-

gramme started with welcome speech followed by Saraswati Vandana and lamp lighting.

In the welcome speech Sr.Anita spoke on the significance of the theme of International Nurses' Day 2016 and emphasized on the fact that the nurses have a great responsibility to improve the health of the population as well as to contribute towards the achievement of the Millennium Development Goals thus acting as a force for change.

Today nursing has evolved into a profession with wealth of skills and professional knowledge. Nurses are the largest group of health professionals, who are the closest and often the only available health workers to the public. CNO read the Pledge and reminds us the oath we took at the starting of our carrier as a Nurse. She spoke about the life of Florence Nightingale, her achievements and contribution to the nursing profession. She encouraged all nurses to follow the path of Florence Nightingale and work with commitment and dedication.

The program was concluded with scientific sessions on :

- **Quality & Patient Safety in Healthcare Institutions –Errors in Emergency Department** by Dr Shakti Kumar Gupta Medical Superintendent Dr R.P.Centre.
- **Role of Communication to improve nursing practice for Patient Safety** by Dr. Deepika khakha, Lecturer College of nursing, AIIMS.

Nursing In-Service Education Activities at Dr R.P.Centre

Educating the people to prevent preventable eye disorders through Daily Health Talk at Dr. R. P. Centre (Daily Health Talk at Dr. R. P. Centre)

Nurses play an important role in promoting public health. Traditionally, the focus of health promotion by nurses has been on disease prevention and changing

the behavior of individuals with respect to their health. However, their role as promoters of health is more complex, since they have multi-disciplinary knowledge and experience of health promotion in their nursing practice.

We want our patients to be informed about how their eyes function, eye diseases and disorders. Education is necessary, so that together, we can participate in the proper management of their vision.

Eye health is often seen as an “extra” type of care relative to more standard physical checkups. In fact, a national survey in America on eye care and correction reported that Americans see doctors for physical checkups and dentists for dental checkups more frequently than they visit eye doctors for eye exams.

However, thinking about eye care in this way ignores the importance that sight has in our everyday lives. It also leads many to be uninformed or misinformed about eye health issues, so much so that they do not, in many cases, seek treatment for conditions that can be easily rectified through medical intervention.

If community members are not aware that their

condition can be treated, or if they are unaware that they have an eye condition that is not, as many believe, simply a natural product of the aging process, then they will not seek treatment. A lack of knowledge could lead to spending the rest of their lives in near or complete blindness.

Although global blindness has been reduced in recent years, some eye conditions—such as diabetes, glaucoma, uncorrected refractive error and age-related macular degeneration are on the rise. They pose growing threats to the vision of millions, mainly in developed countries. These conditions can be treated and even prevented in some cases, but they need to be treated before it is too late. Without

sufficient education and awareness, millions of people do not realize they have a condition that needs treatment, or they do not know what to do. A widespread, culturally-relevant and easily-understandable eye health education program is needed to educate the people.

Ours is a small step towards spreading the knowledge to the people regarding preventing the preventable and manageable eye disorders through early detection of signs and symptoms of eye diseases.

First “Quality and patient safety” handbook released at Dr. R.P. Centre

A handbook on “Quality and Patient safety” (1st edition) was released by Medical Superintendent of Dr. R.P.Centre on International Nurse’s day 2016. It was initiated by Mrs. Yangchen Dolma, Sister Grade I and Ms. T. Thuileiphy, Sister Grade II of Nursing Department under the guidance of Dr. Sheetal and Dr. Kausar of hospital administration.

This handbook includes an overview of the quality and patient safety aspects like standard precautions, quality indicators, incident reporting, management of medications, prevention of fall, surgical safety checklist, handoff communication, hospital acquired infection, biomedical waste management, rights and responsibilities of patients and employees etc.

‘Singleness of purpose is essential for success in life ‘

DR. B.R.A. IRCH AIIMS NEW DELHI

NURSES DAY CELEBRATION-12th May 2016

Nurses day celebration started with the great words of Florence Nightingale "To love is to help one another, to strive together, to act together, to work to the same end." Programme anchored by Ms. Aishwarya

R.L.Gupta Sr. Gd II. Programme started with welcome address by Mrs. Neelam R. Lall. ANS 5th floor. We all took the Nightingale

pledge which was followed by Cake Cutting. Nurses Day Theme Nurses : A force for change IMPROVING HEALTH SYSTEMS'RESILIENCE: theme opening and presentation was done by Mrs. Aleyamma Joseph DNS. Nurses activities report reading was done by Mrs. Nileema Sharad Shingade Sister grade I. Mrs. Neeru Phull Chief guest of the function unveiled the Nurses day poster for the year 2016. And then she presented the Peer Re-

view Group award to Mrs. Mathew Varghese V. Gd II. For saying a thank you to our seniors we presented a small token of love to the seniors who have completed their 30yrs and above years of services and dedicated their guidance to all of us constantly. A motivational song "Yeh mat kaho Khudase meri mushkile badi hai yeh mushkilo se kahdo mera khuda bada hai..." by Mrs. Swaranlata Gill was dedicated for all nursing community. Vote of thanks were given by Mrs. Neelam R. Lall ANS and the programme was closed with the National Anthem by all.

HAND HYGIENE DAY CELEBRATION

Under KAYA KALP the prestigious programme of Ministry of Health And Family welfare, we have

organized various activities in relation to hand hygiene and Bio Medical Waste Management. Infection control team along with hospital administration department Specially Dr. Namrata Makkar and Dr. Samrpita organized training sessions on hand hygiene for Doctors, Nurses, Technical staffs, Class C staff and class D staff. These Classes were taken by the Infection Control nurses & senior residents of hospital administration. We have also conducted health teaching programme for patients and

relatives on hand and personal hygiene. These sessions were coordinated by Mrs. Neelima S. Shingade and Mrs. Aishwarya R.L. Gupta. We have organized quiz on 21/12/15 for all health care professionals of IRCH staff, at conference hall, Main AIIMS.

Mr. Mathew Varghese V., Nursing staff IRCH ICU was the quiz master. Prizes were distributed to the winners by Dr. Sidharth Satpathy. All the hard work was celebrated with the announcement of KAYA KALP award. AIIMS received second position at national level.

MAIN AIIMS

Hospital Infection Control Committee

Infection control Nurses along with Hospital infection control committee conducts half day training programme on "Infection control and prevention" for all categories of nursing personnel, OT technicians and group D employees. In this programme the topics covered are Disinfection & sterilization, Standard Precautions, Infection control in selective procedures and Bio medical Management. Pre and post test are also conducted. In the year 2015-2016 about 300 health care workers were trained and certificate issued.

Apart from this regular surveillance activities and rounds were conducted regularly. Any problems identified were rectified and follow up was done for the same. HCAI data analysis done monthly for ICU's and surgical units.

HAND HYGIENE WEEK CELEBRATION

World Hand Hygiene day celebrated on 5th May 2016 at AIIMS Main Hospital. Posters were put up in all the areas and the importance of hand hygiene has been emphasized in all surgical areas.

Hand hygiene week was observed in **Emergency** under the initiative of Mrs. Suman R Kashyap, DNS emergency services. During this venture the ANS of new emergency ward Mrs. Renu Kapoor took class on importance of hand washing and demonstrated the steps of hand hygiene to the patients, their relatives and hospital staff.

Ms. Remya Paulose, sister grade II, Main emergency took demonstration in paediatric emergency on 05/05/2016.

NURSES DAY CELEBRATION

Main Hospital AIIMS organized a fantastic event on 11th May 2016, Wednesday, to celebrate International

Nurses Day (IND). This event was jointly organized by the CNO office and HICCOM & NIE Teams. The event was conducted in M.S.Seminar room main hospital from 10 am to 1 pm. The event was emceed by Ms. Rebecca Herald, Nursing Inservice Educator. Medical Superintendent Dr. D.K Sharma was the chief guest on this occasion. The Nursing officers of all the centers were special invitees for the occasion. At the outset, all the present dignitaries were welcomed by the emcee. CNO (Acting), Ms.Sarita Mehta led all the nurses present in the reading of the, Nightingale pledge, followed by the unveiling of the IND theme 2016, "**Nurses: A force for Change, Improving Health System's Resilience**" by the chief guest Dr.D.K.Sharma. Sir also shared his thoughts on the occasion of IND and lauded nurses for their good work at AIIMS.

His talk was followed by the talk of Ms.Sarita Mehta. A memento was presented to Ms.Sarita Mehta by Dr. D.K.Sharma on this occasion. Later in the day, Ms.Sarita Mehta did a presentation highlighting the theme of IND 2016 for all nursing officers of AIIMS and all Assistant Nursing Superintendents of main AIIMS. The event concluded with the traditional cake cutting by the medical superintendent, CNO & Nursing superintendents.

Nurses week was observed in New Emergency under the initiative of Mrs. Suman R Kashyap, DNS, emergency services. Faculty, ANS, sister in charges, staff nurses and other hospital staff were participated in the programme. As part of the programme various health education were conducted by the following staff in the emergency area for patient and relatives:

1. Jyoti Agrawal-Diabetes
2. Mansingh Jat - Hypertension
3. Sabitha - Heat stroke
4. Jessy James- Gastroenteritis
5. Ashok Devdutt - Heat stroke

Diligence is the mother of good luck.

OVER VIEW OF TRAUMA NURSING FROM 2006 TILL NOW AT JPNATC-AIIMS

On the outset I would like to congratulate the workforce resources in bringing out the first edition of this E-news letter. It is a privilege to take you through the progress of trauma nurses, through this medium how the nursing unit of JPNATC, AIIMS have evolved into an exemplified face of team work.

JPNATC-AIIMS started with a handful of 25 nurses, picked out from the existing nursing strength of the main AIIMS hospital to work under the dynamic leadership of Prof. M C Misra, Chief, JPNATC and newly appointed faculties of various disciplines of specialty and our then enthusiastic nursing leaders Ms Pyari Minj, Mrs Shashi Singh, and inaugurated by our then Director Prof V. Venugopal to cater services to trauma victims with compassion and love.

Our nursing activities took off with the creation of orthopedic ward under the nursing leadership of Mrs Kirpal Sokhi and her team followed by the creation of emergency unit which we called E.D, under the nursing leadership of Mrs. Julia D Nathaniel and her team of nurses, later a functional O.R was prepared under the nursing leadership of Mrs. Sumathi.R.Nair. later on Nursing Superintendent Post was created & 4 more DNS posts were added. First NS Was Mrs Madhuri Sagar , followed by Ms Sulekha Saha & at present Mrs Nishi Giri

The belief and trust of Prof.M C Misra on the nursing capabilities and to have this centre a **nurse centric speciality centre** have always uplifted our spirit of workmanship with empathy and sympathy to the unfortunate RTA victims care. It is also his unfading guidance and support that we were able to create different cadres of nursing for better outcome of trauma care in means of sending productive citizens back to the society .Now our centre has over 500 nurses working as a full fledged nurse in different cadres as mentioned below.

HOSPITAL INFECTION CONTROL NURSES: Who are actively working in a prospective surveillance programme to reduce the infection rate, inculcating the best standard practices of world under the guidance and supervision of Dr Purva Mathur, Additional Professor, Microbiology

Microbiology

TRAUMA NURSE CO-ORDINATORS: They work as a patient advocate to the numerous RTA patients catered here from their resuscitation to rehabilitation

of the patient under the expert guidance of Dr. Amit Kumar Gupta, Additional Professor, Trauma Surgery

NURSE INFORMATICS SPECIALISTS: A unique creation of nursing cadre where nurses have contributed to the digitalization programme of JPNATC under the able and ambitious leadership of Dr. Deepak Agrawal, Additional Professor, Neuro Surgery.

WCSN(Wound care surveillance nurses): has worked hard to reduce the complications related to wounds & to bring down the pressure ulcer development rate in hospitalized patients of JPNATC, AIIMS from 25% to nearly 0% at present.

ORBO NURSES: The ORBO nurses work hard in increasing awareness and compliance to the spirit of organ donation and have given a new-life to someone.

CLF NURSES; The central linen facility could see the light of the day due to the persistence and hard work/efforts put forward by our then DNS, Mrs Nimma Bakshi to provide a washed, cleaned linen to all our accident victims without shortage. This facility not only does provision but also ensures centralized linen management under the supervision of Dr. Manish Singhal, Additional Professor, Trauma Surgery.

Trauma nurses are involved in many research activities & presented papers. They are taking active part in staff & patient education . Because of good team work /spirit ,trauma nurses have changed the face of nursing They are recognized nationally & Internationally & at par with their nursing standards. This highlighted nursing cadre has contributed to the uniqueness of the centre.

Nurse's day celebration -12th May 2016

JPNATC celebrated international nurse's day, the 106th birth anniversary of Florence Nightangle (The lady with the lamp) birthday on 13th May 2016. The international council of nurses commemorated this important day with the theme

Nurses: A force for change- a vital resource for health. Nurses of JPNATC celebrated this programme at seminar hall from 11:00 am-02:00 pm. Function was inaugurated with lamp lighting ceremony by hon'ble Prof. M.C. Misra (Director, AIIMS). Prof. Misra in his inaugural address stressed about the need of care and compassion in the present world and nurses being rightly positioned in rendering these.

Many of the respected dignitaries from various departments of AIIMS were invited. Dr. Rajesh Sagar (professor, Dept. of Psychiatry) in his special address congratulated the nurses for providing remarkable nursing care throughout and gave a motivational lec-

ture on personal resilience for nurses and the take off message was 'I am, I have and I will". Presence of CNO, nursing superintendent all DNS and other nursing personnel made this event delightful.

Dr.Sushma (additional professor dept. of surgery) appreciated the untiring efforts of nurses in improving the quality of health care at JPNATC. The entire nurses reverberated the Nighingale pledge lead by madam Mrs.Sarita Mehta (CNO,AIIMS).

Nurses of JPNATC participated in various cultural activities (Dance, songs and mime). A general knowledge quiz was also organized to make the function enjoyable. Confidence of nurses was hiked by awarding prize to winners by Dr.Sushma& Madam Nishi Giri (NS, JPNATC, AIIMS). The event had a graceful end by showcasing of talent of members of nursing family.

Online Blood Bank Module

As an initiative to computerize the blood bank completely the blood bank module was started in Trauma centre w.ef 1st January 2016. Blood bank module

constitutes of online donor registration ,online blood request ,reports and utilization . Now the blood bank module is started without biometric donor management.

Advantages: For patients: -Reduced waiting time for getting the services ,prompt and accurate records ,Zero error in terms of eliminating the illegibility of handwriting . For Hospital:-paperless EMR system can be focused

Role Of NIS Coordinating Blood bank team for smooth functioning of software Training of Blood bank technicians, doctors and nurses.

Compliance: Its Compliance is 100%

JPNATC Website (jpnatc.org)

JPNATC website has been revamped and the new website is available at jpnatc.org The website includes all updates JPN Apex Trauma centre.

Staff can be modify their profile by sending request to nis@gmail.com or contacting NIS at 9868398634.

Ambition is the path to success. Persistence is the vehicle you arrive in .

HEALTH EDUCATION ARTICLE ON HAEMOPHILIA

Mr. Mathew Varghese V has published a patient education article on hemophilia in the Dent care health magazine 2016 April issue in connection with world hemophilia day (April 17). He is working as Sister Grade II at Dr. B.R.A.I.R.C.H - ICU.

Ms. Parveen,
Sister Grade-II,
IRCH OT.

सपने और हकीकत

“सपने और हकीकत”

सपने बड़े निराले
अदभुत और सुरीले
हकीकत बड़ी सख्त,
बेरहम और बकरद
सपनों ने लगाए हसीन पर
उड़ चले हम आसमों से परे
हकीकत ने काटे पर,
धरातल पर थे पैर
अम्बर पहुंच से परे
सपने बड़े मधुर,
हकीकत निस्वाद निर्मम
आकर्षण भरे सपने
दौड़ा गए मीलों
हकीकत ने जब खोली आँखें
खड़े थे चौराहे
सपने में थे हम ही हम
हकीकत में कहीं गुम
शीशे के सपने
पत्थर सी हकीकत
टकराये जब दोनों
टूट गए सब
पर कम कहाँ थे हम
झोली भर ली अब
एक से अनेक हुए सपनों की
टूटे या जुड़े
हकीकत से हसीं हैं, ये सपने
अक्सर लौटा जाते हैं ये
होठों की हंसी
जो हकीकत ने चुरा ली थी कहीं।

RPC FOUNDATION DAY

AHA CERTIFIED INTERNATIONAL TRAINING CENTRE (ITC) FOR BLS AND ACLS

AIIMS is an International Training Centre (ITC) for Basic Life Support (BLS) and Advanced Cardiac Life

Support (ACLS) provider & instructor courses on Cardio Pulmonary Resuscitation (CPR) and Emergency Cardiac Care (ECC) .

SALIENT FEATURES :

- 1.Hands-on training on dedicated manikins.
- 2.Successful candidates will be issued AHA certified BLS and ACLS cards.
- 3.Programme curriculum based on updated 2015 AHA guidelines for CPR and ECC.
4. Dedicated sessions on Airway Management and ECG in emergency cardiovascular care

The Purpose

The BLS and ACLS courses enhance the life support skills while provide training in effective team dynamics and basic drug therapy. The main goal of this exercise is to improve patient outcomes by sustaining life and reduce the mortality and disability rates from cardiovascular diseases and stroke.

Why should Nurses do it?

Nurses are usually the first level of responder during a clinical emergency. Their extended interaction with the patients creates a substantial bond and is vital to critical care.

BLS and ACLS certification enables a nurse to facilitate advanced life support during clinical emergencies, which makes it essential for all nurses working in this domain to increase the chain of survival. The programme has generated great response and completed 4 batches

successfully. 58 candidates have been a part of this great initiative .An excellent participation and organisation of AIIMS ITC team has ensured a high quality session both educationally and professionally.

The AIIMS ITC coordinators **Mr.Neeraj Kumar Swarnkar** and **Mr.Prasanth Unnikrishnan C** are available to address your queries in this regard.

SUPERANUATION

Mrs.Neeru Phul joined AIIMS as staff nurse in June 1978 as staff nurse and worked in various departments such as Gastroenterology, Medicine , Paediatrics and Gynaecology.Her work was specially appreciated by Dr.B N Tandon,Dr.M P Sharma and Dr.SK Acharya. After that she was promoted as sister incharge and later as ANS in 1996.

She was promoted as NDS in 2011 and was transferred to IRCH.She was emphasized on patient care, discipline and time management.

Retired from AIIMS in April 2016

Leadership is the art of getting someone else to do something you want done because he wants to do it

AWARDS AND ACCOLADES

Ms. Metilda Robin working as incharge nursing informatics specialist in AIIMS won first prize for poster presentation on 'e learning vision, mission and objectives' and third prize for award paper presentation on 'Extubation intubation protocol' held in NSSI conference held in Srinagar, Jammu and Kashmir.

Ms. Merin Lisa Kuriakose working as Nursing Informatics Specialist in AIIMS won first prize in award paper presentation on 'Outcome following Cranioplasty with bone flap stored in bone bank or in Abdomen in head injury patients', held in NSSI conference held in Srinagar, Jammu and Kashmir.

Ms. Anita Kumari working as nursing informatics specialist in Neurosciences centre won second prize for poster presentation on 'A Study to assess the efficacy of resident evaluation system in Neurosurgery Department' in NSSI conference held in Srinagar, Jammu and Kashmir in April 2016.

Mr. Rejish Koshy Mathew working as Nursing Informatics Specialist in Cardio Neurosciences centre won second prize for poster presentation on 'Role of NIS in optimizing OPD workflow in Cardio Neuro centre of AIIMS, NewDelhi' held in NSSI conference held in Srinagar, Jammu and Kashmir in April 2016.

DR. R. P. CENTRE FOUNDATION DAY-BEST NURSE AWARDEES

Ms. Ngodup Dolma was awarded Best Nurse (ward) on 12th March 2016 on the occasion of RPC foundation day. She joined AIIMS in 1987. She is known for her sincerity, hardworking and humble nature.

Mrs. Indu Bala Sharma was awarded Best Nurse (OT) award on 12th march 2016. She joined AIIMS in 1982. She is known for her good administrative skills. She always has a positive attitude and carries her duties very smartly.

FLORENCE NIGHTINGALE AWARD 2016

Mr. Suresh working as ATLS coordinator in JPNATC received the prestigious '**Florence Nightingale Award**' from honourable President of India Sh. Pranabh Mukherjee on May 12 2016.

Mrs. Poonam Joula was awarded with Lilly Kalia memorial award 2016 for Best Nurse in Operation Room. She is known for her meticulous nature regarding her duties in Operation Room.
