“Exchanging & Escalating Knowledge”

Presents

2nd Annual Emergency Sonography School 2009
2nd, 3rd & 4th March 2009
All India Institute of Medical Sciences (AIIMS)
Ansari Nagar, New Delhi, India

Theme

Sonography, Simulation & Shock

In Association with

A Global Leader in Hand held Ultrasound

The emergency physician (EP) can diagnose life threatening emergency medical problems such as ruptured abdominal aortic aneurysm, traumatic hemoperitoneum, pericardial effusion, and ectopic pregnancy **in seconds**. Most importantly, the EP can do the ultrasound without the reliance on other, (often reluctant) attendings.

Ultrasound is the technology of choice for emergency physicians for a variety of medical conditions. Technological advances have allowed for better image resolution with basic operator skills, thus allowing the emergency physician the capability to use sonograms to help with patient management at the bedside.

EM-TECH in association with SONOSITE is organizing its 2nd annual three day course on Basic and Advanced use of Critical Ultrasound in the practice of Emergency Medicine and Trauma.

Course Objectives:

1. Increase Knowledge of Critical Ultrasound in Emergency Medicine
2. Provide Basic & Advanced Skills to use Critical Ultrasound in Busy Medical College Emergency Departments (EDs) in India
3. Install and fortify confidence in faculty regarding diagnostic and therapeutic applications of Ultrasound in EM & Trauma.
4. To promote ultrasound leadership in EDs in India.

Participants: Academic Faculty and Practitioners from Surgery, Orthopedics, Anesthesia, Internal Medicine, Critical Care, Emergency Medicine, Trauma and Urgent Care.

Comments from participants of 1st Sonography School in 2008

1. I will encourage my entire faculty to attend next year!
2. Fantastic! I will take this back to my Medical College and do a great job.
3. An excellent bridge between evidence and practice.
4. One of the Best I have ever seen!
5. Great to learn applied science via technology.
