Electronic Resource Management: JAMAEvidence & BMJ Research to Publication

JAMAEvidence:

We have started subscribing JAMAEvidence which is published by American Medical Association hosted through McGraw Hill. JAMAEvidence helps decision makers to identify the best available evidence by providing guides to the systematic consideration of the validity, importance, and applicability of claims about the assessment of health problems and the outcomes of health care.

It is IP based access, accessible within AIIMS IP range. The direct URL to access JAMAEvidence: https://jamaevidence.mhmedical.com/

JAMAEvidence mainly focuses on 3 Textbooks;

1) Users' Guides to the Medical Literature: A Manual for Evidence-Based Clinical Practice, 3rd Edition

This book has different chapters which can be downloaded. Additional features include Education Guide slide sets, audio summaries, calculators, and critical appraisal and information cycle worksheets.

2) The Rational Clinical Examination: Evidence-Based Clinical Diagnosis

It is the compilation of The Rational Clinical Examination articles and updates that turns EBM theory into practice via topically organized chapters. Its Rational Clinical Examination summarize current evidence for clinical evaluation of a topic; compiling the evidence to make a diagnosis; and applying the evidence.

3) Care at the Close of Life: Evidence and Experience

It is a part of JAMAEvidence series, this resource offers expert guidance and carefully reviewed evidence on caring for patients at the end of life. It focuses on practical, real-world issues faced by primary care physicians and covers topics from communication issues to disease management to clinician self-care. It also includes a self-assessment quiz and review questions in each chapter to ensure mastery of key concepts. Additional Resources includes: Education Guides, Glossary and Calculators.

BMJ Research to Publication:

Research to Publication is research methodology online program which is a part of BMJ group. It provides various self-study courses that helps doctors and health care professionals to develop clinical research skills, learn how to write a paper before publishing. Created in collaboration with the University of California San Francisco (UCSF), the programme launched in early 2016.

The programme, made up of the 6 courses & modules listed below:
1. How to Write a Paper?
2. What Editors and Peer Reviewers look for?
3. Publication Ethics
4. Designing Clinical Research
5. Responsible Conduct of Research
6. Introduction to Clinical Trials

It is IP based access available within AIIMS IP range.
Direct URL to access the website: http://rtop.bmj.com/

One can register through his / her email ID to create his personalise account to start various online programs. Once registration is completed users can be able to see various online courses.

Steps To Register

It is mandatory to register from the site http://rtop.bmj.com/ at AIIMS Campus / IP

Directly click on register and fill the form requiring email ID, Country and institution name. Once registered from AIIMS Campus / IP can have the access outside of the campus with same login credentials.
