Unregulated Sugar Consumption and the effect on Teeth / Oral Health and Food prints , sugar and teeth: the way forward

Panel discussion and Q&A

Centre for Dental Education & Research,
All India Institute of Medical Sciences, New Delhi

Dear Colleagues,

The Centre for Dental Education and Research, All India Institute of Medical Sciences, New Delhi is organizing an international symposium on "Is Sugar the New Tobacco? "

Sugar has been a point of discussion in the scientific as well as medical realms recently owing to the dangers posed by its excessive consumption. These span across multiple streams of medical science. The symposium aims at addressing this aspect touching upon the details as to how sugar is reaching levels of addiction, akin to tobacco.

Expected Benefits

The symposium will help-

- Demystify the evidence on sugar consumption reaching levels of addiction, akin to tobacco.
- Recognise the significance of control of sugar intake and the subsequent benefits.
- Understand the global best practices on Control of Sugar intake and initiate deliberations on formulation of guidelines suitable to Indian context
- Decipher the multidisciplinary approach necessary for curbing dangers associated with excessive intake of refined sugar, with emphasis on the role of dental professionals.
- Identify the Public Health facet of this concept and strategise future initiatives

This symposium is not to be missed by post graduates in all fields of Dentistry, Community Medicine, Nutrition and Public Health . Faculty members are invited and also encourage residents to attend this symposium. Looking forward to welcome you in person.

Dr. O.P. Kharbanda
