October 25, 2012

The newly constructed underground parking between the Gents' Hostels and the Masjid Moth Campus is likely to be operationalized in near future. It is proposed to carve out a dedicated parking space for the Faculty. In order to take this process forward, there is a need to assess the requirement of the parking slots required for the Faculty Members. In addition, the access systems (special token / smartcard / electronic access system etc.) need to be developed / adapted.

Accordingly, it is requested that Faculty Members may kindly inform if they are interested in using the above upcoming parking facility. This information may be sent to the undersigned by email ([rajdeep.rawat7@gmail.com](mailto:rajdeep.rawat7@gmail.com)) by 15<sup>th</sup> November 2012.

It may be noted, that walking through the Gents' Hostels, the new parking area is not far from the PC-Teaching block and the main Hospital. The distance is the same or less as from E-Type flats in the Eastern Campus. The underground parking would, therefore, eminently suit the colleagues living off the main campus.

It is also proposed that once this facility is operationalised, parking in the residential area in the Eastern Campus may need to be discontinued because of the complaints of physical risk to the pedestrians (due to double-sided parking leaving no space to walk), and the overall inconvenience caused to faculty and residents of this Campus.

It is hoped that with the commission of this faculty, we would reduce the congestion on the campus to a significant extent.

This issues with the permission of Professor-Incharge (Security).

Shri R.S. Rawat  
Dy. Chief Security Officer
