ALL INDIA INSTITUTE OF MEDICAL SCIENCES, NEW DELHI

F. No. 40-30/2022-Estt.I   26-05-2023

OFFICE MEMORANDUM

Sub: Committee for making AIIMS New Delhi campus fully Wi-Fi enabled

AIIMS New Delhi campus has a mix of patient care, academics & research activities going on 24x7 and to facilitate the same, campus wide secure Wi-Fi connectivity is very essential. It has been noted that currently only new buildings are Wi-Fi enabled and majority of the campus has very poor wifi connectivity which is causing great discomfort to patients, staff and visitors alike. Also, this is leading to various areas setting up their own Wi-Fi networks to facilitate their day to day working or academics and it is not always possible to monitor the said networks centrally for any sort of cyber threats, etc.

In line with the global best practices adopted by various medical universities for patient care, teaching, research good governance & for optimal deployment of Integrated Medical University Information System (IMUIS), it is desirable that the entire AIIMS New Delhi campus is Wi-Fi enabled. Strong Wi-Fi connectivity shall also help AIIMS New Delhi in implementation of eCasualty & eICU, allow easy access to eLibrary, etc. and help in seamless sharing of data & files on a secure network across AIIMS.

To ensure rapid deployment of a secure campus wide Wi-Fi network, the following committee is constituted:

1. Prof Vivek Tandon, Dept. of Neurosurgery, AIIMS New Delhi – Chairman
2. Dr Vivek Gupta, Computer Facility, AIIMS, New Delhi - Member
3. Sh. Jitender Saxena, Superintending Engineer, AIIMS, New Delhi - Member
4. Dr Arun Verma, Assisting Faculty Computer Facility – Member
5. Mr Harishankar, Sr Programme, Computer Facility – Member Secretary

This committee shall float an Expression of Interest (EOI) for deployment of a campus wide Wi-Fi network by 15th June 2023 and shall request the interested firms to survey the existing AIIMS campus and submit their gap analysis report & solution design by 15th July 2023. The committee shall also simultaneously discuss with various mobile & broadband internet service providers the various options to boost Wi-Fi connectivity within the AIIMS campus by using their existing fiber networks, etc. and ensure implementation the best available solutions in a timely manner.

The Committee will submit its progress report to the undersigned on a fortnightly basis.

26/5/2023

Prof. M Srinivas
Director
