About I-STEM

The Multi-dimensional I-STEM Web Portal

The I-STEM National Web Portal, which was launched formally in Jan.2020 by the Honourable Prime Minister Shri Narendra Modi, began as an initiative to "Link Researchers and Resources" by creating a database of R&D resources in various institutions across the country. Its genesis was the very positive experience gained at the Centre for Nano Science and Engineering (CeNSE, Indian Institute of Science, Bengaluru) in sharing its national facilities with the R&D community of the country. The I-STEM portal today hosts an inventory of more than 20,000 equipment in some 850 institutions in various parts of the country. These can be utilized by researchers through reservations made in consultation with the host institution and paid for through a secure payment gateway. Though the pandemic has hindered extensive use of the portal and sharing of resources, the large number of visits to the portal is evidence of steadily increasing awareness of the I-STEM national initiative, sponsored and funded by the Office of the Principal Scientific Adviser (OPSA) to the Govt. of India. This is also reflected in the large number of researchers who have registered on the Portal.
