AIIMS, New Delhi

Subject: Request for Uploading PAC Certificates on AIIMS Website

Sir/Madam,

Please find enclosed here with the Proprietary Article Certificate (PAC) issued by the concerned Department and the OEM in respect of the proposed procurement.

The PAC Certificates are required to be uploaded on the AIIMS website for inviting comments/objections from prospective vendors, if any, as per procurement guidelines and for maintaining transparency in the procurement process.

It is therefore, requested that the enclosed PAC Certificates may kindly be uploaded on the AIIMS website for necessary action.

Enclosures:

1. Department PAC Certificate
2. OEM PAC Certificate

**Proprietary Article certificate (PAC)**  
**(For Chemicals, Spare Parts, Reagents, and Consumables etc.)**

- i. The Indented goods are manufactured by m/s Biodur products GmbH Germany
- ii. Item Name: silicone and polyester polymers
- iii. Model /Part/ Catalogue No: enclosed
- iv. Reason / Justification which makes the requirement proprietary#

The Department has been using Biodur products for silicone and polyester plastination for more than 15 years, and all existing plastination protocols and specimen-processing workflows have been standardized with this system. Since plastination materials are process-sensitive and not readily interchangeable without fresh validation, substitution with another product may affect impregnation, curing, shrinkage, finish, and long-term preservation quality. Any such change would require complete revalidation and may risk failure of valuable specimens, wastage of costly materials, and possible compromise of valuable and often irreplaceable anatomical specimens. Procurement of Biodur products is therefore justified on technical compatibility, process standardization, reproducibility and quality assurance in plastination work

1. It is certified that market survey has been done and has been found that no other manufacture is manufacturing similar/equivalent specifications which can fulfill the vital requirements of and user.
2. It is certified that the purchase is proposed to be made on proprietary usage basis because any other material/equipment/industrial chemical, etc. if used will lead to deviation and affect the integrity/accuracy, validity of analysis of the assignment/patient care.
