Suction Devices

PuddleVac® Floor Suction Device

PuddleVac® Floor Suction Device

The PuddleVac floor suction device provides a simple solution to a problem often encountered during procedures utilizing fluid distension media – pools of fluid on the operating room floor. Suction should be set at a standard hospital suction level of approximately 300 mmHg. The PuddleVac is easily moved wherever it is needed. A single PuddleVac can collect an average of 700ml of fluid per minute.
