IMMUCOR SSO BASED TYPING – HLA A LOCUS

Specification:

- SSO typing kit for HLA A loci with Taq Polymerase comes in a 50 test pack size.
- This kit is compatible to use on Luminex 100/200 both.
- HLA Typing results within two Hrs. (depending on the sample size)
- High Throughput (can be process 32 samples for three locies ABDR in a one go or 96 wells can be process in one go)
- Very low amount of DNA required i.e 5 ul of DNA with concentration b/w 15-18ng/ul is more than sufficient.
- This kit is compatible with Match IT software for interpretation & Analysis (latest allele database).

IMMUCOR SSO BASED TYPING – HLA B LOCUS

Specification:

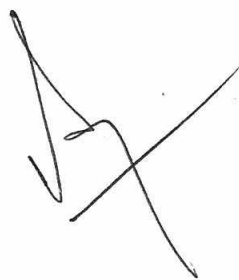

- SSO typing kit for HLA B loci with Taq Polymerase comes in a 50 test pack size.
- This kit is compatible to use on Luminex 100/200 both.
- HLA Typing results within two Hrs. (depending on the sample size)
- High Throughput (can be process 32 samples for three locies ABDR in a one go or 96 wells can be process in one go)
- Very low amount of DNA required i.e 5 ul of DNA with concentration b/w 15-18ng/ul is more than sufficient.
- This kit is compatible with Match IT software for interpretation & Analysis (latest allele database).

A handwritten signature in black ink, consisting of a stylized 'S' followed by a long horizontal stroke. Below the signature is a small, circular stamp or seal, which appears to contain some text but is mostly illegible due to the quality of the scan.

IMMUCOR SSO BASED TYPING – HLA C LOCUS

Specification:

- SSO typing kit for HLA C loci with Taq Polymerase comes in a 50 test pack size.
- This kit is compatible to use on Luminex 100/200 both.
- HLA Typing results within two Hrs. (depending on the sample size)
- High Throughput (can be process 32 samples for three locies ABDR in a one go or 96 wells can be process in one go)
- Very low amount of DNA required i.e 5 ul of DNA with concentration b/w 15-18ng/ul is more than sufficient.
- This kit is compatible with Match IT software for interpretation & Analysis (latest allele database).

IMMUCOR SSO BASED TYPING – HLA DPA/B LOCUS

Specification:

- SSO typing kit for HLA DPA/B loci with Taq Polymerase comes in a 50 test pack size.
- This kit is compatible to use on Luminex 100/200 both.
- HLA Typing results within two Hrs. (depending on the sample size)
- High Throughput (can be process 32 samples for three locies ABDR in a one go or 96 wells can be process in one go)
- Very low amount of DNA required i.e 5 ul of DNA with concentration b/w 15-18ng/ul is more than sufficient.
- This kit is compatible with Match IT software for interpretation & Analysis (latest allele database).

Handwritten signature and initials in black ink, consisting of a large stylized 'X' and a small circular mark below it.

IMMUCOR SSO BASED TYPING – HLA DQA/B LOCUS

Specification:

- SSO typing kit for HLA DQA/B loci with Taq Polymerase comes in a 50 test pack size.
- This kit is compatible to use on Luminex 100/200 both.
- HLA Typing results within two Hrs. (depending on the sample size)
- High Throughput (can be process 32 samples for three locies ABDR in a one go or 96 wells can be process in one go)
- Very low amount of DNA required i.e 5 ul of DNA with concentration b/w 15-18ng/ul is more than sufficient.
- This kit is compatible with Match IT software for interpretation & Analysis (latest allele database).

A handwritten signature, possibly 'A. J.', is written above a small circle containing the initials 'JAD'.

IMMUCOR SSO BASED TYPING – HLA DRB1 LOCUS

Specification:

- SSO typing kit for HLA DRB1 loci with Taq Polymerase comes in a 50 test pack size.
- This kit is compatible to use on Luminex 100/200 both.
- HLA Typing results within two Hrs. (depending on the sample size)
- High Throughput (can be process 32 samples for three locies ABDR in a one go or 96 wells can be process in one go)
- Very low amount of DNA required i.e 5 ul of DNA with concentration b/w 15-18ng/ul is more than sufficient.
- This kit is compatible with Match IT software for interpretation & Analysis (latest allele database).

A handwritten signature in black ink, consisting of a stylized 'S' followed by a long horizontal stroke. Below the signature is a small, circular stamp containing the word 'COPY' in a bold, sans-serif font.

IMMUCOR DSA SPECIFICATIONS

- 1) **Description:** Donor Specific Antibody (DSA) is a bead-based immunoassay used for the qualitative detection of IgG antibodies to donor-specific Class I and Class II Human Leukocyte Antigens.
- 2) **Test pack size:** 96 test.
- 3) **Specimen sample required:** Patients serum sample and donor cells.
- 4) **Procedure:** Very simple and user friendly and take upto 2 hrs.
- 5) **Compatible system:** Luminex 100/200.

A handwritten signature and initials are present at the bottom center of the page. The signature is a stylized, cursive 'A' with a long horizontal stroke extending to the right. Below it, there are initials that appear to be 'JH' or similar, enclosed in a small oval.

IMMUCOR LSA-1 & 2 SPECIFICATIONS

- 1) **Description:** LIFECODES LSA™ Class I and Class II are bead-based immunoassays used to qualitatively detect HLA IgG antibodies.
- 2) **Test pack size:** 24 test.
- 3) **Specimen sample required:** 10ul serum sample.
- 4) **Procedure:** Very simple and user friendly and take only 1 hrs.
- 5) **Compatible system:** Luminex 100/200.
- 6) **Performance Quality:** Single beads are coated with single recombinant antigens to enhance the quality of results. With very-very less prozone effect.

A handwritten signature, possibly 'A. J.', is written in the center of the page. Below it, there is a small, hand-drawn circle containing the word 'upon'.

IMMUCOR LMX SPECIFICATIONS

- 1) **Description:** LIFECODES LifeScreen Deluxe is a qualitative bead-based immunoassay used to detect IgG antibodies to HLA Class I and Class II molecules.
- 2) **Test pack size:** 96 test.
- 3) **Specimen sample required:** 10-15ul serum sample.
- 4) **Procedure:** Very simple and user friendly and take only 1 hrs.
- 5) **Compatible system:** Luminex 100/200.

A handwritten signature, possibly 'J. X.', is written above the date '2009', which is enclosed in a small oval.

IMMUCOR ID 1 & 2 SPECIFICATIONS

- 1) **Description:** LIFECODES Class I and Class II IDv2 are bead-based immunoassays used to qualitatively detect Panel Reactive HLA IgG antibodies (PRA).
- 2) **Test pack size:** 24 test.
- 3) **Specimen sample required:** 10-15ul serum sample.
- 4) **Procedure:** Very simple and user friendly and take only 1 hrs.
- 5) **Compatible system:** Luminex 100/200.
- 6) **Performance Quality:** Beads are coated with Human cell lines so it will only detects those antibodies which are presents on calculation sheets.
