Sub: Purchase of Scalpel Blade Removal System.....regarding..

Sir,

It is a common knowledge that in operation theatres scalpel blades are removed from blade handle by the use of forceps. Sometimes this process may cause sharp injuries from the blade and this is reported to be more common than sharp injuries involving syringes.

To prevent injury at the time of removal of blade, and ensure its' meticulous disposal, Scalpel Blade Removal System is very useful.

It improves staff safety by ensuring the used scalpel blade is removed with safe single-handed technique and then safely contained until final disposal.

In view of the above mentioned features and its' utility, it is requested that the 130 Blade Box , may kindly be Tendered for hospital use. *It is a patented proprietary item.*

Thanking you,

L.R. Murmu
