**Technical Specification for Noiseless Suction System with Variable Flow Rates**

- Noiseless suction unit with fast vacuum build up.
- It should be mounted on a well balance trolley with at least four good quality antistatic castors with brakes.
- The machine should be based on heat resistant piston/cylinder technology with high-tech material.
- It should have membrane vacuum regulator. It should have at least - 700 mmHg or more vacuum build up.
- It should have variable flow rates of 40, 50 & 60 l/min, operation of which should be clearly displayed on the front panel.
- It should have autoclavable Poly Sulfone double jar (3 ltr.) with changeover facility from one jar to another jar should have disposable suction liners with solidifiers with reusable Polycarbonate jar of 1.5 lts,
- should have overflow protection facility so that any kind of fluid or blood should not enter in the machine or any type of leakage.
- It should be USFDA & CE approved. All the components including accessories should be from the same company.
- Should have 5 years Warranty and should quote CMC Prices for 5 years after warranty.

**Proprietary Article Certificate (PAC) (Machinery & Equipment)**

1. The indented goods are : Medela AG, Switzerland  
Manufactured by M/s
2. Item Name : Noiseless Suction Machine with variable speed
3. Model No. : Dominant Flex
4. Vital Technical Performance Parameters : Noiseless and fast vacuum build up with variable  
Required which makes the requirement flow rates 40L/min, 50L/min, 60L/min in  
Proprietary## single machine gives benefit for better  
suction during critical surgical procedures
5. No other make or model is acceptable for : Only Single Manufacturer  
The following reasons

It is certified that market survey has been done and found that no other manufacturer is manufacturing similar/equipment specifications which can fulfill the vital requirements of end user.
